

Impress your Attending. Template Digitally.

- Template and plan your cases digitally using the latest in orthopedic online software.
- Use the same tools orthopods use to perform pre-operative planning.
- Share cases with your attending physician and fellow residents.
- Keep all your cases organized and accessible wherever you have an internet connection.
- Use the latest technology to set yourself apart.

To qualify and apply for a free subscription to OrthoWeb:

To qualify, your hospital must have at least one active subscription to OrthoWeb. Check with the chairman of your residency program to ensure someone in your hospital is a paid OrthoWeb subscriber.

To apply for your free subscription to OrthoWeb, you must provide documentation that demonstrates you are currently enrolled in a credentialed, U.S.-based orthopedic residency program.

Documentation includes **one** of the following:

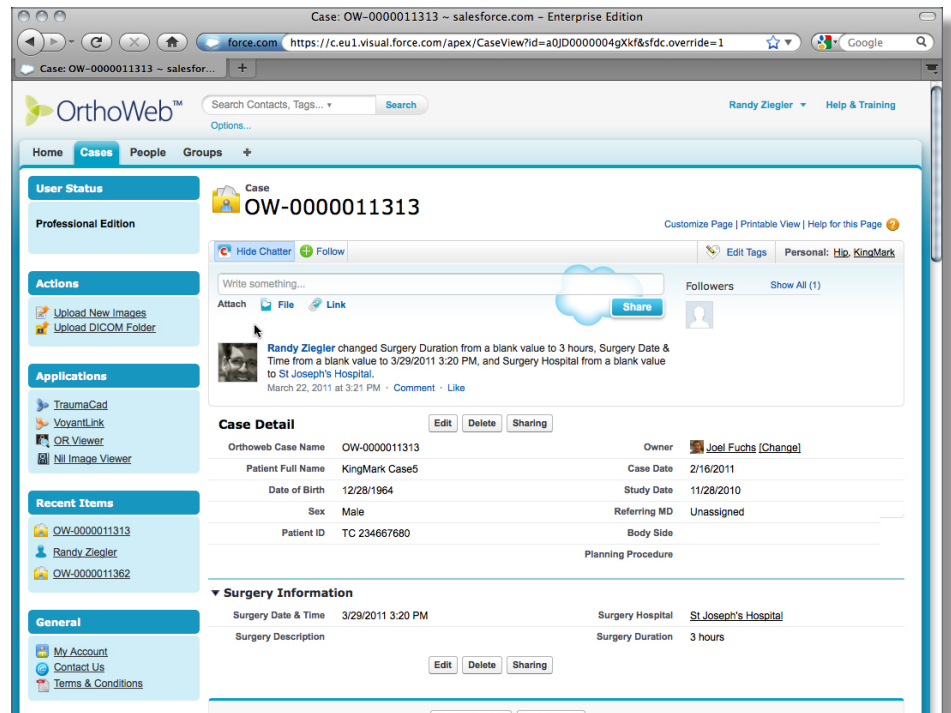

1. A copy of your dated, resident hospital ID badge.
2. An email letter from the Chairman of the residency program from an organizational email address.
3. A signed letter from the Chairman of the residency program on organizational stationery.

Application process:

1. Go to www.orthoweb.com/residentsprogram and submit the application form to the left.
2. Voyant Health will send you a confirmation email. The confirmation email will contain instructions for providing documentation of your current enrollment in a residency program.
3. Send documentation of enrollment to Voyant Health for review.
4. Upon review and approval, Voyant Health will create your new OrthoWeb account and send you an invitation email to access your account and begin using OrthoWeb.

Plan anywhere.
Access everywhere.

OrthoWeb™ is a highly secure, web-based service that eliminates the hassles and technical issues with moving and sharing images. Patient images are uploaded to your OrthoWeb account—giving you convenient access to cases wherever you need them. Plan and template from home, the hospital, or the operating room.

A new way to work—your orthopedic workflow is in the cloud.

Plan with TraumaCad®
OrthoWeb subscriptions include complete TraumaCad digital templating functionality. Plan and template wherever you are. Finally, a seamless orthopedic workflow.

Image sharing with VoyantLink™
Automatically upload and download cases to and from your OrthoWeb account. Upload images from your digital x-ray system or automatically pull from PACS. Now your cases are always where you want them to be—the home, clinic, hospital, and OR.

Create your own views
Create custom views that match the way you organize and manage your cases. View case information the way you like.

Claron Technology's Nil Image Viewer
A special image viewer allows you to access CR, DR, MR, and CT images with any HTML5-compatible browser—providing viewing capabilities on multiple devices, such as Apple's iPad.

View in the OR
View your images in a specially-designed surgery mode that displays large images, implants, and measurement details. Stop watches track surgery duration and activities such as tourniquets, cement timings, etc.

Comprehensive tagging system
Tag cases and items by standard medical terminology or your own customized tags to improve searching and organization.

Collaborate with colleagues
Invite colleagues and reps to collaborate on cases with you. Track the conversation for each case. Send everyone notifications of surgery locations, schedules, list of implants, etc.

Follow users. Join groups.
Form a professional community to collaborate and share specific kinds of information. Stay up to date on postings and activities.

Keep track of account activity
Receive email notifications on account activity—when new cases are uploaded, when colleagues share cases, when reports are created, when you receive a message, and more.
